1904 CATALOGUE,

COPYRIGHTED BY

The C. T. Nelson Co.,

COLUMBUS, OHIO.

IN presenting our New 1904 Catalogue we have endeavored to make it the best and most complete catalogue of our line of work that is published. We desire to call your attention to the new goods we have added to our line of manufacturing, and also to the fact that we have greatly increased our manufacturing facilities and can furnish all kinds of Veranda work and Mouldings, either stock work or special designs.

Estimates made on work to architects' designs.

Buy your goods direct from the manufacturers and save money.

We manufacture our own goods, have a large factory (with a capacity of 300 Columns daily) built especially for turning out Veranda Work and Mouldings.

Our Columns are all hand turned.

We can furnish to order Columns of any desired size or pattern.

Colonial Columns and Colonial Veranda Work is our specialty.

Our shipping facilities are first class, and we are prepared to ship all orders promptly, as we carry a large stock of dry lumber at all times.

We can furnish these goods delivered at your station for less than you can manufacture them yourself, as we make a specialty of this business.

Write us for prices on anything you may need in our line.

NOTICE

All the cuts used in this catalogue belong to us and are copyrighted, and we warn anyone against using same.

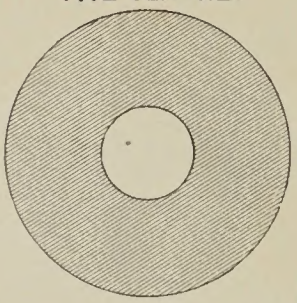
MANUFACTURERS OF

TUSCAN, DORIC, IONIC, CORINTHIAN AND COMPOSITE

COLUMNS

and all kinds of Special Work to Architects' Details.

CROSS SECTION OF SHAFT OF SOLID POPLAR COLUMN WITH HOLE BORED THROUGH THE CENTRE.



This kind of Work is our Specialty and we carry a full stock of Large Poplar Squares for making these Special Columns.

WE have on hand 7x7, 8x8, 9x9, 10x10 and 12x12 poplar squares in all lengths, and all bored with 2½ inch hole through the center to prevent checking. These squares are No. 1 Yellow Poplar and are cut outside the heart of the log. Large squares with the heart of the log in them, even if the heart is bored out, are worthless, as they will check.

All columns larger than 12 inches in diameter are staved up. Columns from 7 inches to 12 inches in diameter we furnish the staved up shaft at the same price as the solid bored shaft. We consider one as good as the other as we make a staved column that is strictly first-class in every respect.

The caps and bases are made separate out of plank.

We give the shafts of the columns a coating of linseed oil or primer and securely crate them so that they arrive at destination in good condition.

Write us for prices giving sizes and specifications.

We make prompt shipments.

Our columns are made of No. 1 Poplar and we cannot compete in price with the colonial columns that are made with white cedar shafts or out of other cheap woods.

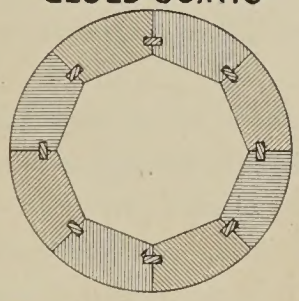
Built Up Columns

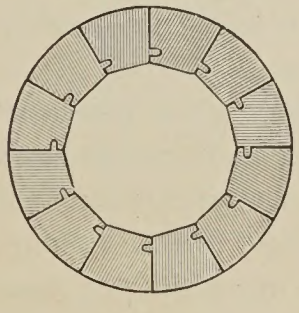
To Special Designs *and* Architects' Details

CROSS SECTION OF SHAFT
OF STAVED UP COLUMN
WITH TONGUE AND GROOVE
GLUED JOINTS



Columns 16 in. and up in diameter, have slip tongue.

CROSS SECTION OF SHAFT
OF STAVED UP COLUMN
WITH TONGUE AND GROOVE
GLUED JOINTS



Columns 8 to 15 inches in diameter, have solid tongue.

We Manufacture the Best Staved Up Column on the Market

THESE "Built up" Columns are staved up out of 2 inch, 2½ inch or 3 inch Lumber and with 14 to 30 staves to the column, according to the size and style, and we carry on hand a stock of dry thick poplar plank for making these Staved Columns. The lumber is thoroughly kiln-dried and the staves are joined together by tongue and groove glued joints running the entire length of the stave, which makes a perfect joint and one that will stand. Our staved columns will not open in the joints.

All columns from 8 inches to 12 inches in diameter are made from 2 inch lumber, 14 staves to each shaft, which admits of the stock finishing full thickness and gives a good, strong, substantial column and enables us to make the turn-outs, fillets and neck mould on the shaft.

We can furnish White Pine Columns in sizes from 7 inch to 12 inch shaft, but they cost more than the Poplar Columns as the lumber is much more expensive.

We make a specialty of large columns 18 inches to 36 inches in diameter, 18 to 26 feet long, and carry on hand 3 inch clear poplar 18, 20, 22 and 24 feet long for making staves for large columns.

We manufacture hand carved Wood Capitals of any size or style and also carry a full line of Composition Capitals.

We furnish Columns and Capitals for interior work as well as exterior.

We make a specialty of this business and have a fully equipped factory and the best of facilities and manufacture first-class goods.

WE MAKE PROMPT SHIPMENTS

The C. T. NELSON CO., Columbus, O.

A Few Things Worth Considering

THERE is hardly a house built nowa-days but has its veranda and the veranda has become a very important part of the house. The material used in the veranda should be just as good as is used in building the house, as they are put up to stay and should last many years. Poplar or Whitewood is one of the best woods for this purpose as it works smoothly, takes paint well and stands exposure to the weather.

We use the best poplar and turn out our goods in the best possible manner and have had many years experience in the manufacture of veranda work and furnish goods that are first-class in every respect.

There are many cheap priced columns put on the market made out of cheap woods and in a cheap manner, and it is well to consider the quality of the goods before you buy. The goods that are cheapest in price are not usually the cheapest in the end.

Facts in Regard to Built Up Columns

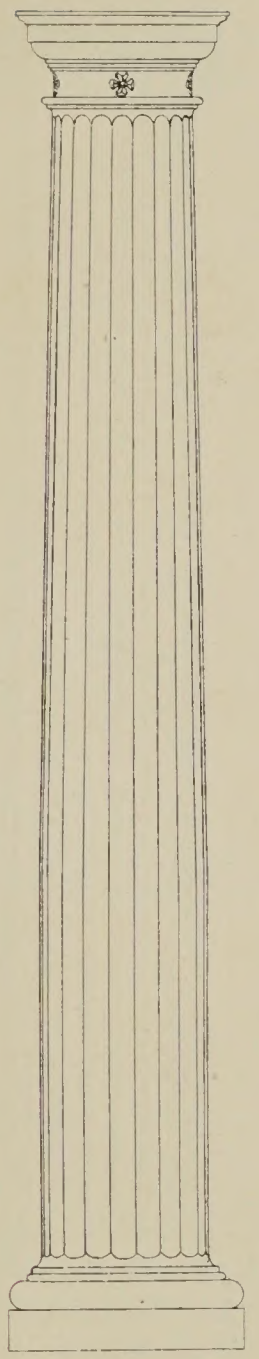
THERE is nothing better than the built up or staved column when it is properly made and properly taken care of, but as a column is exposed to all kinds of weather and constant changes in the atmosphere, they must be well manufactured in the first place and then must be kept painted.

We have had many years experience in the manufacture of staved columns and think we are making them just as good as they can be made, and we think our work in all parts of the country will bear us testimony.

You cannot expect the cheap priced staved columns that are made out of thin lumber, (in many cases not thoroughly dry), and in a cheap manner, to stand very long exposure to the weather. All of our staved columns are primed one coat before leaving our factory to protect them.

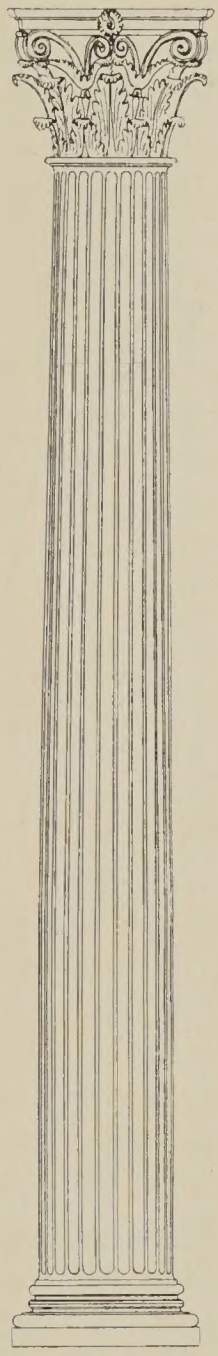
Staved Columns should not be exposed to bad weather before they are put in place, for if the inside of the column is exposed to moisture it is likely to cause the joints to open.

PORCH COLUMNS.



DORIC COLUMN,

No. 32



CORINTHIAN COLUMN,

No. 33

We are making a specialty of fine Veranda Work to architects' details and furnish goods that are strictly first-class in every respect and exactly to details.

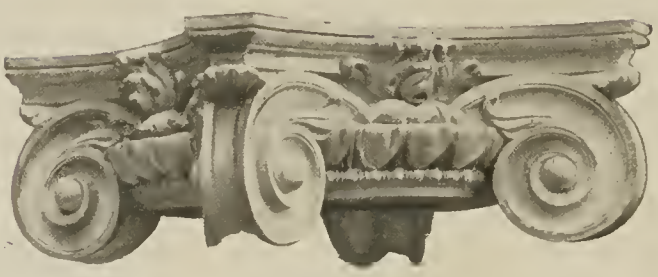
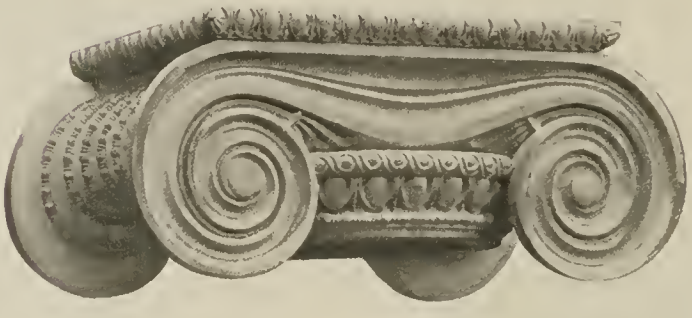
COMPOSITION CAPITALS.



SCAMOZZI



GREEK IONIC

We carry in stock both of the above styles of composition caps, in all sizes, from 5 inch to 12 inch. Can furnish any size to order.

Pilaster Caps made in all Sizes to match Column Capitals.

These capitals are made of a composition in the nature of terra cotta lumber and are as durable as stone. They are much finer in modeling and execution than either terra cotta or stone and much less expensive. They will not swell, shrink, check or decay. This material, being fibrous in character, may be sawed, nailed or screwed, but being of a mineral composition, is not affected by atmospheric conditions.

These Capitals also made for interior work, with grain to match any wood, also made to match interior plaster finish.

COMPOSITION CAPITALS.

ROMAN CORINTHIAN

ROMAN CORINTHIAN PILASTER

Can furnish Capitals in Greek Corinthian, Italian Renaissance Corinthian, Roman Ionic, Angular Ionic, etc.

Our Composition Caps are the best on the market.

Made for interior work as well as exterior.

COMPOSITION BRACKETS AND ORNAMENTS.

No. 2353—5x5¾x11¼ inches.

No. 2410—4x5x12 inches.

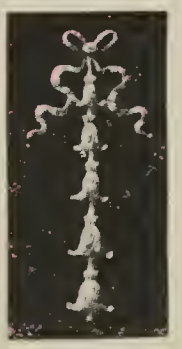
Made in all sizes. When ordering give projection, drop and face. Can furnish other designs. Send details for estimate.

No. 1730—Gable Ornament.

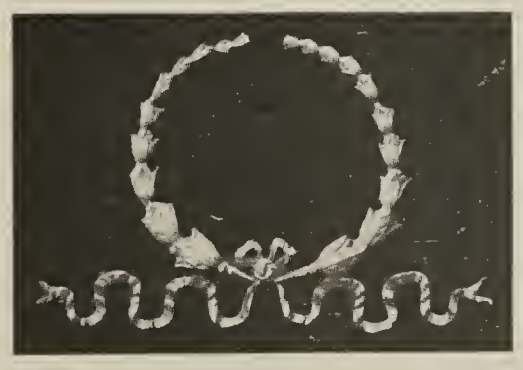
The material used in making this Gable Ornament will not swell, shrink or check, and work is on ½ inch thick background, so that any carpenter can nail same on to wood without spoiling the effect of the design and is the proper thing for exterior use.

COMPOSITION PORCH ORNAMENTS

FESTOON No. 288



DROP No. 246



WREATH No. 237

In ordering, give size of space to be covered.

This material can be easily applied by any carpenter or capable mechanic.
